

Poly Box Shippers

Poly shipper systems have been designed to work primarily with chilled products that need to be stored and transported at a temperature below -18°C . The poly shipper system is designed for a 24 hour delivery cycle.

We have carried out extensive testing on our temperature control packaging systems in a controlled laboratory environment. These system when used in conjunction with our Chilled Packaging™ coolants have been validated to confirm their performance.

Poly shipper food systems are available in a variety of sizes and a choice of two distinct styles, our standard design and our revolutionary space saving flat pack design. Both system are moulded from high density polystyrene (EPS) making them extremely robust and good for multi-use.

The Benefits:

- Excellent thermal insulation properties
- Lightweight and easy to handle
- Protective and shock resistant
- Suitable for shipping chilled or frozen products
- Water and moisture resistant
