

Paternoster

– Vertical Carousel Machines

The Dexion Paternoster is a secure and safe storage system where items do not have to be searched for. It is also an excellent solution for the optimal reduction of picking times through batch picking, offering a quicker stock turnover. With the rotating automated storage solution, it saves floor space and keeps products away from dust and light.

Benefits of Dexion Paternoster

- Store more goods in the same space. Machine height up to 15 metres.
- Carrier dimensions are suitable for most standard picking boxes.
- Reduces picking errors by up to two thirds.
- Safe and ergonomic work environment, goods presented at optimum height.
- Well-lit access opening that can be closed and secured by electronic door, which guarantees the safety of both users and goods.
- Particularly suits batch picking. Average picking time 15 s / row.
