

INDUSTRIAL PRODUCTS

Specialists in providing vibration control to industry...

AV Industrial Products Ltd have great pleasure reporting of their great success exhibiting at the Bauma Munich Messe. Throughout the seven days the quality and quantity of leads far exceeded expectations. Many orders were taken during the show with many large OEM targeting the AV Industrial Products Ltd stand.

AV Industrial Products are also excited to announce that they will be exhibiting at CONEXPO which takes place at the LVCC Las Vegas, Nevada in March 2023.

During Bauma and into CONEXPO, AV Industrial Products Ltd are excited to bring their new range of Hydro-Bushes into the marketplace. Hydro-Bushes complement the current range of Hydro-Mountings that AV Industrial Products Ltd have manufactured during the past 5 years. The AV Industrial Hydro-bushes work by the same operating principles as per the Hydro-mountings which is to dampen vibrations via viscous fluid filled chambers. The outer steel sleeve encases a rubber moulding and fluid filled chambers which provide the mounted system with vibration isolation whilst also providing high levels of dampening.

The Hydro-Bushes greatly improve operator experience within harsh dynamic applications including cabin mountings, agricultural equipment, pumps & compressors, floating structures, etc. Feedback from our customers emphatically endorse the AV Industrial Hydro-Bushes at dampening vibrations and greatly improve their working environment.

AV Industrial Products Ltd welcome your visit to their stand at CONEXPO which is in the South Hall First Floor – stand number S65325 and in the mean-time please do not hesitate to contact them via the following:
