

UKCA Traffic and Car Park Signage

What is UKCA/CE Certification?

UKCA/CE marking is a self-certification scheme, meaning that when a product is UKCA/CE marked, the manufacturer has verified compliance with the essential health and safety requirements as indicated in the applicable European product directives and regulations.

Every permanent Road Traffic sign which is installed on a public highway must be UKCA/CE Certified.

Stocksigns is a member of ARTSM (Association for road traffic safety and management), as such all of our UKCA/CE signs meet the EN 12899-1-2007 standard.

You can read the GOV guidance on UKCA Marking [here](#).

Why choose Stocksigns for your UKCA Traffic and Car Park Signage Requirements?

- 2-3 working days lead time.
- Dedicated Account Manager
- Made by a fully accredited and Certified Manufacturer
- Long-lasting, high-quality signs
- Every type of CE sign is available from warning road traffic signs and directional traffic to speed limit signs.

EV Charging Point Signs

With an estimated 715,000* zero-emission Battery Electric Vehicles currently on the UK's roads and plenty more on the way, it is becoming increasingly important to install new charging points across the country. Highlight the charging points on your premises with our EV charging point signage.

**Estimated number of EVs according to the RAC*

Applications for UKCA Traffic and Car Park Signage

- Construction site Temporary Parking Signage
- Electric Vehicle Charging points
- Industrial Car Parks
- Facilities Management
- UK Highways

Case Study: Supplying traffic signs in Gloucestershire with Knights Brown

As part of Gloucestershire County Council's £150 million scheme to improve its highways, **Knights Brown** installed a series of designated crossing points, widened the junction, and raised the level of the surrounding roads. Stocksigns provided a number of mounting directions, speed limit and give way signs that helped to improve motorist and pedestrian safety.
