

Roof Drains & Ventilators

A comprehensive range of outlets and roof vents that are compatible with most flat roofing materials, including bituminous felt, EPDM, TPO, PVC and Liquid Coatings in a comprehensive range of sizes to ensure watertight jointing pipework to provide an effective drainage system for rainwater, suitable for industrial, commercial and domestic applications, that are quick and easy to install with a complete range of capping to provide a cost effective alternative to complicated and expensive metal outlets and vents.

TPE Roof Drains

This is the only roof drain in the world with a special circular row of holes. Through these holes, the waterproofing membrane torched over its flange is totally blended with the membrane below.

Benefits

- Manufactured from a special compound of thermoplastic rubber
- Highly resistant against low temperatures
- Remains flexible to approx. -40°C
- Spigot provided with 2 or 3 couples of anti-infiltration rings

Application

- Flat roofing
- Compatible with any sort of bituminous waterproofing membrane
- Perfect for bonding to the waterproofing membrane

TPE Through Wall Drains

Benefits

- Manufactured from a special compound of thermoplastic rubber
- Highly resistant against low temperatures
- Prevents water ingress
- Protects ventilation pipes
- Resilient against harsh weather conditions

Application

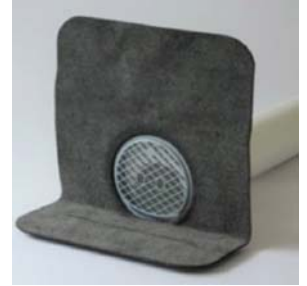

- Flat roofing
- Compatible with any sort of bituminous waterproofing membrane
- Perfect for bonding to the waterproofing membrane

Roof Drains & Ventilators

Renovate Roof Drains

Refurbishment drains for flat roofing, with or without pipe seal or leaf guard, in 60.90 & 100 mm pipe drain and 110mm dia x a tube length of 600mm.

Renovate SBS flange vent pipe cover

Strong polyamide with an SBS Torch On with a torch on flange and the parapet Vent Pipe Cover provide a neat, waterproof cover for soil & vent pipe protrusions through flat roofs.

PVC Roof Drains

High quality PVC, versatile range with a flange that is totally smooth for perfect adhesion to the membrane. Available in a comprehensive range to suit any application.

PVC Through Wall Drains

High quality PVC, versatile range with a flange that is totally smooth for perfect adhesion to the membrane. Available in a comprehensive range to suit any application.
