

SHEET METAL ENCLOSURE MANUFACTURERS BASED IN THE UK

WEDNESDAY, OCTOBER 27TH, 2021

CNC punching and CNC bending

Sheet metal enclosure manufactures based in Hampshire, UK. V and F sheet Metal have been manufacturing a wide range of enclosure components and assemblies. Enclosures used in the electronics, lighting, heating and audio industries. We have been manufacturing sheet metal enclosures for over 30 years. Using many different ferrous and non-ferrous sheet metals.

V and F Sheet Metal stand out amongst enclosure manufacturers with such a wide range of experience in different industries. Being subcontract sheet metal workers enables us to learn from one industrial sector and apply those ideas to another. A form tool we develop to help us produce a curved section for an air conditioning unit may be just what's needed for a lighting reflector. We always have our eye on ways to save money when we review our customer's designs.

aluminium sheet metal fabrications

Working with our customers to save them time and money. Flexibly batch sizes to suit production needs. Alternative material suggestions to save on treatment and finishing costs. We have a vast collection of [CNC punching](#) and [CNC bending](#) tools. Most standard cut outs can be catered for. We also have a laser cutting facility in house so even if you come up with a really tricky design we will still be ready to help you.

Want to see more past sheet metal enclosure projects? Take a look at our [Pinterest Boards](#).

If you are looking to review a range of enclosure manufacturers, V and F Sheet Metal should certainly be investigated.

Please send your drawings (STEP, SAT, DXF, DWG or PDF) to sales@vandf.co.uk and we will be happy to help you.
