

## Outdoor Storage Furniture

Spring it's all about the outdoors and we've come with some great storage ideas perfect for any school environment.

Have a look at our two suggestions for this season: the large outdoor plastic lockers and the new cycle storage bins.

First, the large outdoor plastic lockers are to use as personal storage or for sports equipment. They can be used outdoors but also indoors. Made from recyclable plastic they are environmentally friendly. Hygienic and easy to clean, they are also UV stable and vandal resistant.

The plastic lockers are stackable in order to create your ideal bank of lockers. Supplied with either a padlock or an integral keyed handle and in a wide choice of plain colours and stone effect finishes.

We offer a wide variety of colours for the body of the locker as well as for the door and you can also choose from a key lock or a padlock locker. They can be supplied as individual units or in multiple units to bolt together in banks. The delivery is on us!

Second, the colourful cycle storage bins are secure and convenient way of storing bicycles at schools, universities and other public settings. Large enough to suit most bikes they can be fitted in a space saving interlocking design with access from either side or bolted together in a line. A padlock, key and ground fixing bolts come as standard, with a padlock securing bracket for added peace of mind.

The cycle storage bins are manufactured from polyethylene, a strong recyclable UV resistant material, which means the colours will not fade over time. It is also vandal resistant, can be installed in a short amount of time and requires minimal maintenance as plastic does not rust.

Choose from a wide range of colours on our website, the products will be delivered free of charge and fully assembled!

If you need any help planning your outdoor space, we're always happy to help. Contact us on 0345 3 58 59 60 or write us an email at [sales@furnitureforschools.co.uk](mailto:sales@furnitureforschools.co.uk)
