

PRECISION WORKHOLDING PRODUCTS

EVARD PRECISION SA

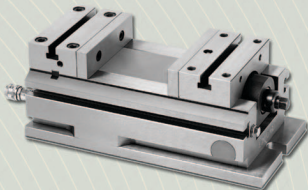

Evard Precision SA manufactures products to the quality and accuracy synonymous with Swiss engineering.

The range consists of 3 types of precision vices, each having a full array of sizes and accessories to suit most applications.

POLYMUT

Capable of multiple parts clamping enabling optimum machine utilisation. Range comes in 2 sizes, 50 and 80mm wide and lengths between 250 to 700mm.

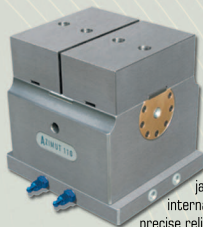

EM MECHANICAL VICES

5 sizes from 50 to 160mm wide. Typical high degree of accuracy and rigidity.

E PNEUMATIC VICES

7 sizes from 70 to 200mm wide. Exhibits the accuracy and robustness of the mechanical version, with the added advantage of pneumatic tightening, affording speed of operation with adjustable clamping pressures.

AZIMUTH

A pneumatically actuated self-centring vice. Available in 4 sizes with 70 to 160mm wide chuck jaws. Capable of internally or externally precise reliable clamping using adjustable operating pressure.
