

Certification Engineer (Medical Equipment)

About the Job

Due to continued growth and investment we are seeking a qualified Certification Engineer to join our product safety management team in the United Kingdom.

This job offers continuous professional development in a modern high-tech laboratory.

Do you have?

- A good understanding of design control, risk management and assessment
- Knowledge of safety and performance standards for medical electrical equipment
- Hands-on experience in design, development or manufacturing of medical devices

Are you?

- Qualified to degree level or equivalent in a relevant subject
- Customer focussed and effective in evaluating technical information
- Interested to work with a variety of medical device manufacturers

Experience of working in a manufacturing facility certified to ISO 13485 or organisation accredited by UKAS would be advantageous.

Role expectations

- Review and evaluate medical equipment and technical documentation to demonstrate conformity with safety standards and regulations
- Communicate effectively with customers and staff and provide technical support and assistance as required

Your focus will be on providing expert technical input and support for product approvals and conformity matters relating to a wide range of medical electrical and electronic equipment.

Benefits

We will provide additional training as required and offer you the chance to develop a long and rewarding career with many opportunities to fulfil your potential. Depending on your experience, you can expect to receive a flexible competitive salary with progressive reviews subject to your personal development.

For more details please apply online ASAP as immediate interviews and starts are available.

Salary: £36,000 to £56,000
