

# DOUBLE GLAZED FRAMELESS GLASS CURTAINS

## Frameless Glass Windows

Frameless windows in our innovative slide and stack design enhance your home with altogether different windows. Slim, sleek and with more functionality than conventional casement windows. Our unique windows promising uninterrupted views. Best of all they come with that seamless glass look of our frameless patio doors.

Using our own patented double-glazed system, ultimate clarity comes between the panes of glass. You get none of the metal edges of a typical double-glazed unit. At the same time there is no loss of thermal efficiency. Gorgeous clear views when closed. Fully open windows without the static mullions and transoms of other aluminium windows.

## Double Glazed Room Dividers

Our bespoke double glazed room dividers enhance your interior with elegant and distinctive slide and stack doors. Perfect for dividing a room while still enjoying the feeling of space.

A clear unobstructed view, beautiful glass edges with the flexibility and functionality only our doors provide.

# DOUBLE GLAZED FRAMELESS GLASS CURTAINS

## Patio Doors

Our ultra-contemporary frameless slide and fold door comes designed and expertly-crafted by us.

No other door has the look, the convenience or the functionality.

Other luxury brands boast minimal sightlines but our door beats all of these with nothing but a slim gasket and glass edges to your door panels.

We also provide our frameless double-glazed doors in any RAL colour.

Our doors are submitted for independent testing and they meet the latest security standards including the PAS 23/24 Enhanced Security Performance Requirements.

## Removeable Corner Posts

Our open corners provide all the benefits of our frameless double-glazed system with the added feature of a full open corner. Your ceiling appears to float, creating a spectacular feature in your home.

Our beautiful corner doors provide all the security, weather performance and functionality while fully opening up your home. Your dream new extension awaits. With door panels up to 3m high our open corner design gives you so much more than other aluminium bifolds.
