Multiwall Polycarbonate

Meridian stock both Sunlite & Marlon ST Multiwall Polycarbonate sheet in 4,6,10,16,25 & 35mm.

We offer a FREE cut to size service & can offer same day delivery subject to T&C's. Multiwall Polycarbonate sheets are self extinguishing and comply with the most demanding of international fire resistance standards.

Our sheets offer high impact resistance; 10 year ltd warranty; remarkable installation; excellent light transmission; Solar Control option available.

Main applications are:

- **Conservatories**
- **Carports**
- **Patio Canopies**
- **Walkways**
- **Greenhouses**

HEAT REFLECTING MULTIWALL POLYCARBONATE

The advanced design reduces heat penetration
By blocking over 65% of the sun's infrared heat.

- Helps prevent conservatories from overheating
- Energy saving - deduction in air conditioning costs
- Smooth attractive look
- Light & easy to install, yet strong & durable
- Weather proof for all climates
- Prevents UV damage to humans, furniture & other objects

EZ Glaze Polycarbonate Panels

EZ Glaze offers smart design, elegant glass-like appearance, versatility, low maintenance and sustainable performance.

EZ Glaze incorporates a proprietary profiled design which enables it to be installed over rafters with a high loading capacity.

EZ Glaze is easy to fasten: the panels are simply screw fixed to the supportive structure and joined by overlapping.

Clear_Elegant

Easy To Install

Glass Appearance

Protects Against UV Radiation

Rafter Installation

Superior Strength Durability

Main Benefits

- Clear and elegant appearance
- Easy, fast and safe installation
- Minimal maintenance
- UV Protection - blocks 99% of UV radiation
- Greater hail resistance
- High wind and snow load resistance
- No need to climb on the roof to install

Typical Applications

- Pergolas and Gazebos
- Patio enclosures
- Sun-rooms
- Carports

Galvanised Corrugated Roofing

Galvanised roofing has become increasingly popular for carports and lean-to pergolas. This type of roofing provides both temporary and permanent solutions, while giving the structure a traditional aesthetic. The galvanised coating on the roofing helps protect it from rust and corrosion, making it durable and long-lasting. Additionally, the galvanised finish adds a touch of classic charm to the overall design of the carport or lean-to pergola. Whether you are looking for a temporary shelter or a permanent addition to your outdoor space, galvanised roofing is a great option that combines functionality, durability, and aesthetics.

Specifications

- Length: 5, 6, 7, 8, 9, 10 & 12ft
- Width: 660mm
- Cover width: 610mm
- Profile: 8/3
- Thickness: 0.5mm
- Material: Galvanised steel

Recommendations

- Width overlap by 1 overlap (50mm)
- Length overlap at least 300mm
- Use angle grinder to cut
- Secure on every other corrugation
- Spacing between rafter 400mm - 600mm apart
- At least a 60mm overhang
- 5 - 10° pitch

Features

- Durability
- Weather resistance
- Low Maintenance
- Fire resistance
- Energy efficiency
- Cost effective
- Versatility
- Eco-friendly
- Sound insulation
- Aesthetic appeal

Flat Sheet & Glazing Plastics

Our range of Flat glazing plastics can be used in variety of applications.

- **Secondary Glazing**
- **Security Glazing**
- **Balustrades**
- **Signage**
- **Exhibition & Display Stands**
- **Interior Cladding**
- **Protective Screens**

Plastic Glazing Sheets

**Glazing Sheets – Lighter than glass, up to 90% light transmission,
Easy to clean and Good thermal insulation.**

Here at Meridian we are stockists of a wide range of Glazing Plastics such as Perspex, Acrylic, Solid Polycarbonate, and Styrene.

Clear Styrene Sheets

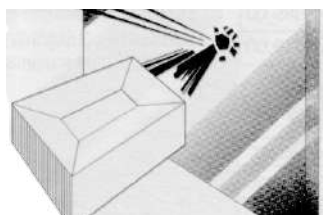

For internal use only, these sheets do not have UV protection and will turn yellow if positioned in direct sunlight. Available in 2mm and 4mm in sizes from 915mm x 610mm to 3050mm x 2050mm.

Acrylic Glazing Sheets

For internal or external use, these sheets are UV protected and do not discolour in direct sunlight. Available in 2mm, 4mm & 6mm in sizes from 915mm x 610mm to 3050mm x 2050mm.

Solid Polycarbonate Security Glazing

Ideal for use as safety glazing or vandalism protection, withstands blunt force pounding, UV protected, available in 4mm & 6mm in sizes from 1220mm x 610mm to 3050mm x 2050mm.

Coloured Perspex

Perspex cast acrylic sheets are one of the most creative, versatile and colourful materials in the market and application possibilities are endless. Available in a clear finish with light transmission higher than glass or a range of colours, textures and finishes.

Acrylic sheets have an excellent resistance to UV rays and most ranges have a 20 year external warranty. It is lightweight, half the weight of glass, as twice as strong. Eco friendly too as it can be recycled all the way back to its raw monomer.

Aluminium Composite

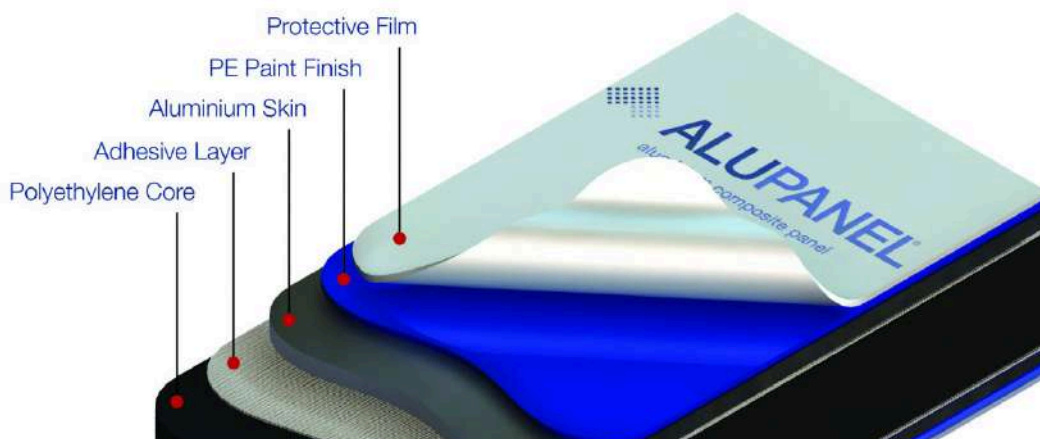

ALUPANEL® aluminium composite sheet consists of a polyethylene core sandwiched between two 0.3mm aluminium skins. With all the benefits of aluminium composite and the full range of colours and finishes, ALUPANEL® combines durability with flexibility.

Particularly suited to high wear environments, this formable and dual-sided sheet has one satin finish surface and the other in 75% gloss.

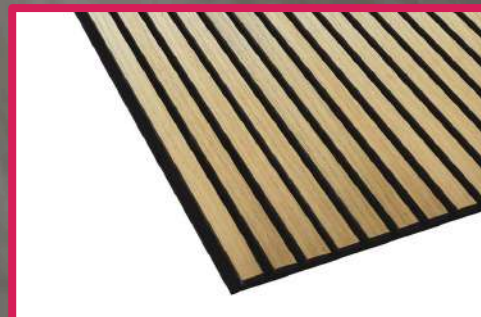

Alupanel comes with a 5 year external guarantee including brushed aluminium (other brushed and mirror finishes are guaranteed for internal use only).

PVC Hygienic Cladding

Suitable for Lining/Cladding walls in areas where Food Stuffs are prepared. EEC Approved. Can also be used for other applications where good hygiene is necessary.

We hold large stocks of Hygienic cladding in White, Coloured and Decorative, with a range of trims to suit.

White Hygienic cladding is available in 2mm x 2440 x 1220mm and 2mm x 3050 x 1220mm. It has a Class 1 flame spread and Class 0 fire propagation.

Coloured Hygienic cladding is available to order in a wide range of gloss and matt colours, matching trims are available too. Sheet size 2.5mm x 2440mm x 1220mm

NEW! Decorative Hygienic cladding is now available to order. This unique range of decorative hygienic wall cladding combines the benefits of our uPVC fire rated material with high-resolution digitally printed images and a UV cured clear hard coating. The coating provides permanent protection to the printed surface offering superior abrasion and chemical resistance whilst the sheet material is easily cut, formed and glued.

Sulcado 3D wall Coverings

Create a stylish 3D feature wall design with these decorative wall panels. The Sulcado slat wall panelling is lightweight, durable and easy to install & clean.

Sulcado Panels are a great addition to any home and are ideal for a feature wall in Living rooms and bedrooms. It can even be installed in more demanding areas such as the hallway, work areas, or the kitchen.

These wood slat panels help to soundproof the interior and eliminate reverberation and echo in larger rooms. The Installation of these panels is quick and easy, simply mount onto desired wall using adhesive, or screws & pins and easily cut to specification using a sharp saw or jigsaw.

Premium Composite Decking

WPC Range of Decking, now featuring Double faced with a wood-grain and grooved option in one board.

WPC Decking is a revolutionary decking with a unique composition to replicate wood without the maintenance and hazards of the traditional timber deck. It's designed to be maintenance free, safe, easy to install and environmentally friendly. We offer a 10 year guarantee as well as offering 5 different colours, 2 designs and 2 lengths, as well as a whole range of matching accessories.

Features

- Made using Eco Friendly materials
- Maintenance free requires no upkeep
- Highly anti-slip in the wet
- Does no rot, splinter or warp
- Does not host algae growth
- UV weather stable
- Resistant to food and drink stains
- Intricate natural woodgrain detail
- Invisible 'host head' fixing
- Wide choice of designs and colours
- Class 1 fire retardant

Premium Composite Fencing

Wood composite is a durable and ecological alternative to hardwood. Its made from a mixture of wood flour and PVC, which provides an extremely durable, colourfast garden fencing that does not warp and is much more weather resistant than solid wood.

It does not require treatment with oil, solvents or cleaning products, The estimated life span exceeds that of conventional wood and afterwards is fully recyclable, therefore it contributes to the protection and conservation of the tropical rain forests.

Tongue & Groove System

10 YEARS WARRANTY

On all mechanical properties

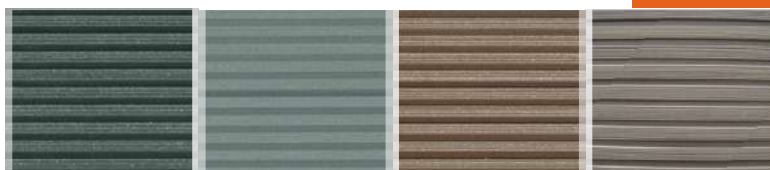

The modular tongue-and-groove system makes for easy yet secure installation, on difficult surfaces too.

Slat Wall System

Clean-cut garden fencing in wood composite slats add value to every house and every garden. Whatever the setting, they always look good and exclusive and cannot be distinguished from solid wood. The distinct perspective and lined structure of the slats also make your garden seem bigger than it actually is.

Installation Guide

Outdoor Cladding

Low Maintenance

Composite outdoor cladding demands minimal upkeep, eliminating the need for frequent painting or staining to maintain its appearance.

Insulation Properties

Composite cladding options provide additional insulation to the building, contributing to energy efficiency.

Weather Resistance

It provides excellent resistance to harsh weather conditions, including rain, UV rays, and temperature fluctuations, maintaining its appearance over time.

Environmental Sustainability

Materials incorporate recycled content, making them a more environmentally friendly choice compared to traditional cladding materials.

Outdoor Slat Wall

Low Maintenance

Outdoor slat wall made from composite materials demands minimal upkeep, offering a hassle free solution for enhancing outdoor spaces.

Weather Resistance

It withstands exposure to different weather conditions, including rain and sunlight, without deteriorating or losing its aesthetic.

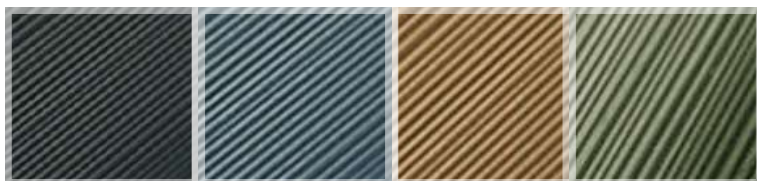

Termite & Pest Resistance

Composite materials are naturally resistant to pests, ensuring the longevity and integrity of outdoor slatwall installations.

Environmentally Friendly

Many composite slat wall options incorporate recycled materials, aligning with sustainability goals.

Roof Lights

Whether you are adding an extension and want to make the most of the natural light by adding a Roof Lantern or perhaps need an opening dome for ventilation. At Meridian we stock a range of standard opening and non opening Domes as well as a bespoke range of Domes, Roof Lanterns and Solaglaze skylights.

We can offer uPVC or Aluminium Frames in a choice of colours and sizes and electronic openers with automatic rain sensors are great for those summer showers, Whatever your needs give Meridian a call and we can talk you through the best option for you.

Roof Domes

Our rooflights are manufactured to the highest standards and are designed to give maximum weather protection and light transmission. Extruded from high quality UPVC this range offers an integrated water management system to shed water to the outside of the rooflight. They are manufactured from UV protected Polycarbonate in a choice of profiles such as Domes and Pyramids. Polycarbonate offers high impact resistance as well as a variety of glazing options in either clear, opal, diffused or bronze tint.

A range of fixed and opening domes are available from stock. Custom Domes can be made in 10 working days.

Solaglaze

Naturalight's Solaglaze range is available in UPVC and aluminium and is designed to be aesthetically pleasing whilst offering an effective way of letting in natural light.

Our UPVC Solaglaze is available in a self-finish of either white or Anthracite grey and the aluminium Solaglaze is powder coated to the customer's desired colour from our standard RAL range.

This system is generally installed to a builder's upstand, once in place it's easily installed using the supplied colour co-ordinated angle brackets, which can be hidden behind the plasterboard

Recommended solarglaze should be installed to a minimum pitch of 5. This is to help facilitate water run run-off thus reducing water ponding and to help alleviate the build-up of silt deposits.

Premium Roof Lanterns

The Aluminium Skypod

Architectural aesthetics with added protection against the elements

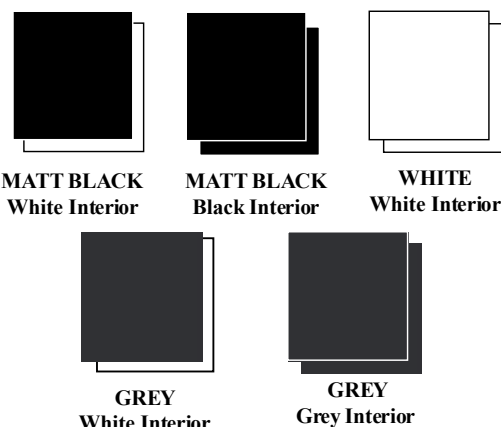

Our premium roof lantern offers thermally broken aluminium ridge, ring beam and aluminium rafter top caps. This means it also offers greater protection against the harsh summer mid-day sun. All internal bars are capped in the conventional way with PVC-U and are available in black, white or grey finish.

The system has a fixed roof pitch of 20° and is supplied in a choice of five self cleaning, temperature controlling glass options.

Code	Description	Price
TREBLK	Capping Sheet 8m x 1m 4.5kg Black	£65.66

Reoxthene Ultra Lightweight Underlay

Code	Description	Price
ULT/UNDER	Torch-On Underlay 2mm 15m x 1m BK	£55.00

We stock Esterflex SBS torch-on is a range of polyester based torch-on cap sheets & underlay, coated with a high quality polymer modified SBS bitumen coating. The underside Esterflex SBS and mineral Esterflex SBS is protected by polyflam a special polyethylene film which melts upon torching

Our Ultra lightweight underlay uses Reoxthene technology which allows bituminous polymer membranes to have greater thickness but with a weight reduction of up to 40%. This means improved work ability and higher daily laying output, with lower transport & handling costs.

Composite Doors

Safe & Sound

Your front door is the first point of contact with your home. With the reassuring 'clunk and click' as it closes behind you, relax and unwind as you shut out the world.

Our range of highsecurity, low maintenance and energy efficient, traditional and contemporary composite front and back doors have been specially selected to give you a choice of design and style to perfectly complement your property. You can't choose a better composite door.

Step 1

Choose your door style

Step 2

Choose your side light if required

Step 3

Select a colour option

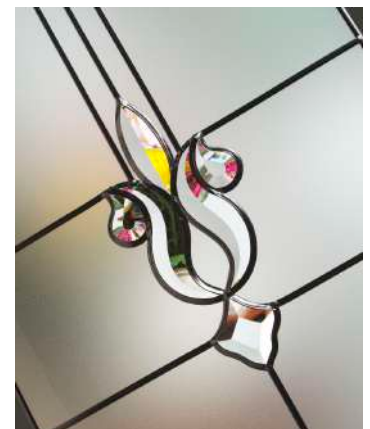

Step 4

Choose a glass design

Step 5

Pick your door furniture
