

# Quality Engineer (Product Safety)

## About the Job

---

We are seeking a qualified Electrical/Electronics Engineer to join our product certification management team in the United Kingdom.

This job offers an opportunity to enhance your career development in the framework of a scheme which facilitates international cooperation and exchange among participating Certification Bodies. Also known as the Scheme of the International Electrotechnical Commission System for Conformity Testing and Certification of Electrical Equipment, it applies to all manufacturers of electrical and electronic components and products with a vision for worldwide safety compliance.

## Do you have?

- A good understanding of quality management systems and procedures
- Knowledge of product safety standards and compliance legislation
- A product testing background in scientific or medical equipment

## Role expectations

- Communicate effectively with customers and staff and provide technical support and assistance as required
- Participate in testing, customer facility assessments and staff training activities
- Review test reports, certificates and quality system documentation
- Project management

## Are you?

- Qualified to technician or engineering degree level in a relevant discipline
- Customer focussed and able to multitask
- Keen to expand your knowledge

Experience of working in an organisation accredited by UKAS would be advantageous.

## Benefits

We will provide further technical training and offer you the chance to develop a long and rewarding career with many opportunities to fulfil your potential. Depending on your experience, you can expect to receive a flexible competitive salary with progressive reviews subject to your personal development.

For more details please apply online ASAP as immediate interviews and starts are available.

Salary: £28,000 to £42,000
