

RHEINTACHOS October 2017

- ◆ RHEINTACHO @ PTC Asia
- ◆ Impressions of our last exhibition participation

Dear International Partner,

The countdown has started - only a few days until PTC Asia kick-off!

Will you be there - 31.10. until 03.11.2017!

PTC Asia in Shanghai is a genuine „world fair“. It ranks as the most important showcase for power transmission and control technology. Be there when RHEINTACHO introduces you to its latest product developments in Hall E3, Booth B5-4!

Curious? Some of our highlights have already been revealed:

New rotational speed sensor with position detection. Our [YouTube Video](#) of our new rotational speed sensor, shows the different measuring principles using application examples on an electric motor.

The better choice - RHEINTACHO [M8 rotational speed sensor](#) with temperature detection.

So be one of the first 50 visitors and win a fidget spinner!
