

RHEINTACHOS October 2020

- ◆ Covid 19 situation in Germany and at RHEINTACHO
- ◆ Exhibitions/ webinars
- ◆ New products/ new clients

Dear International Partner,

As of today, RHEINTACHO “survived” the COVID19 issue in good shape. Right, now, Germany is taking new activities, to reduce the current dramatic increase of the infection rates throughout all Germany. So, eg bars, restaurants and fitness clubs will be closed next week. Schools, Kindergardens and of course **the industrie will remain open.**

Visits at RHEINTACHO and visits from RHEINTACHO staff to clients are still allowed. But due to internal COVID regulations allowed only, if not possible to be replaced by video or phone. **RHEINTACHO is fully operational.** All office employees are working roughly 50% from home offices. Production is ongoing. The supply of material is currently also within an acceptable level. All supply lines are really tense – but not broken. This is because we have a very nicely increasing business since September. It looks like, that we will be able to compensate most of the dramatic loss of business of Q2 now until the end of year 2020. So, take care and stay healthy!

For any further questions about this, please do not hesitate to contact me: sexauer@rheintacho.de

No exhibitions - but nice webinars

As a reaction on the loss of opportunities to contact clients and business prospects in real life, such as exhibitions and visits, we established a nice range of webinars. Please check out our website:

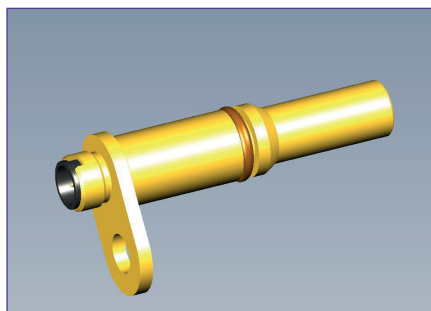

[RHEINTACHO Webinars](#)

We will be more than happy, to meet virtually and guide you through various topics >>> make your choice!

New products/ New clients

During the last months, we have been able to finalize some important new product ranges and also to close deals with important clients. Unfortunately, we are not allowed, to share the names with you. We can just give you the information, that both topics are within our range of mobile hydraulic applications.

Again unfortunately, one of the new speed sensor series is not available for general sales. But due the importance of this for RHEINTACHO, we consider it worth, sharing with you.

New range of custom-branded speed sensors
