

**Available now from Ecopac Power 100 watts, 150 watts, 200 watts and 300 watts
DALI DT8 Led Drivers with 24 volts output.**

DALI DT8 (Digital Addressable Lighting Interface DT8) is an extension of the standard DALI protocol (Digital Addressable Lighting Interface), which is a widely used communication protocol in the lighting industry for controlling and dimming LED lights and other lighting fixtures.

DALI DT8 builds upon the capabilities of the original DALI protocol, introducing additional features and improvements, especially in the regard of colour control and tunable white lighting. Ecopac Power offers several options in DALI DT8, the **ELED-100-24DP2 DT8**, **ELED-150-24DP2 DT8**, **ELED-200-24DP2 DT8** and **ELED-300-24DP2** all available from stock.

Designed with consistent and flicker-free dimming across the entire dimming range, making it ideal for environments where precise lighting control is essential. With its wide input voltage range, advanced thermal management, and over-current protection, the **ELED-DP2 DALI DT8 series** guarantees reliable and durable operation.

One of the major improvements with the **ELED-DP2 DALI DT8 series** is the ability to control the colour of LED lights. It introduces colour control channels, which allow users to adjust the colour temperature or choose specific colours of light. This feature is particularly beneficial in applications where dynamic lighting scenes and ambiance are desired, such as in retail spaces, hospitality venues, and architectural lighting.

The **ELED-DP2 DALI DT8 series** supports tunable white lighting, ranging from warm white to cool white, to suit different tasks, preferences, or time of day. Tunable white lighting finds extensive use in applications like offices, healthcare facilities, and residential spaces.

For more detailed information about the ELED-DALI DT8 series or any of our other products, please do not hesitate to contact us by phone at 01844 204420 or by email at info@ecopacpower.co.uk.
