

## Ecopac Power announces release of MEAN WELL High Output Voltage Power Supply

**As the demand for high voltage applications increases, Ecopac Power is pleased to introduce the MEAN WELL CSP-3000, a 3000 watt high voltage output product.**

The **CSP-3000** provides 120V/250V/400VDC high voltage output with constant current limit set at 100% output, making it ideal for applications such as laser, UV curing, charging equipment, communication equipment or any centralized systems that require high power and high voltage. Additionally, its programmable voltage and current feature allows for output voltage and current to be adjusted over a wide range by applying an external DC voltage signal.

With high frequency modulation that can be achieved by applying an external 10V PWM signal between 500Hz~1kHz, the **CSP-3000** is the perfect choice for customers looking for high-power and high-voltage options. Designed with key features such as active current sharing (up to 3 units), remote ON/OFF, and auxiliary power which enhances the end system design flexibility and application range.

Its built-in active PFC function, high efficiency up to 93%, and built-in DC fans for forced air cooling make it a reliable and efficient choice. The **CSP-3000** is UL/Dekra/EAC/CB/CE safety approved and comes with a 5-year warranty. Its compact size, measuring 278 x 178 x 64 mm, makes it easy to integrate into any system.

Ecopac Power is committed to providing customers with high-quality, reliable, and innovative power supply solutions. With the release of the MEAN WELL CSP-3000, we continue to expand our product line and meet the requirements of various industries.
