

Ecopac Power are pleased to announce the release of MEAN WELL's new LAD series of Enclosed Security / Fire Alarm Power Supplies

In response to the growing need for secure, dependable, and intelligent power supplies for security and fire alarm systems, the MEAN WELL **LAD series** has been specifically engineered to meet all required standards.

The **LAD series** features a 1U thin enclosed design, making it ideal for installations with limited space. The series is available in 120 watts, 240 watts, 360 watts and 600 watts, with output voltages of 13.8V, 27.6V, 41.5V and 55.2V. All models feature CH1 that can supply power to the loads, while the built-in auxiliary output CH2 can charge the battery, providing a UPS function.

The CH1 output voltage of the **LAD series** can be adjusted from -20~+5%, making it suitable for different battery types and fine voltage adjustments. The series also comes with complete protections, including short circuit, over current, over voltage, over temperature, under voltage, reverse polarity, and battery protection.

Designed in line with GB17945 fire regulations and with safety approvals such as CB, UL, RCM, CE, UKCA, and EAC. This ensures that all models are safe, reliable, and certified. The **LAD series** is perfect for a wide range of applications, including security control, fire protection, emergency lighting, access control alarm, computer room and peripherals, central monitoring, and all other UPS system needs.

With the release of the **LAD series**, MEAN WELL, the leading power supply manufacturer, continues to lead the power supply industry with high-quality, reliable, and cost-effective products.
