

Ecopac Power and MEAN WELL announce the NCP-3200 Series: a 3200 watt 2-in-1 Rack-mounted Power Supply & Battery Charger

This new generation **NCP-3200 series** designed and launched by MEAN WELL, the global leader in standard power supplies, is a result of MEAN WELL's commitment to providing high-quality power supply solutions at a reasonable cost with optimal efficiency. This new generation of rack-mounted power supplies offers three output voltage models to cater to diverse applications in the power electronics, communication industries, and energy systems' equipment.

The **NCP-3200** 24VDC/48VDC low-voltage models are equipped with firmware settings for 2-in-1 application, making them suitable for a wide range of applications, including light/heavy industrial machinery and equipment, automation, or mobile equipment, 5G or communication base stations, large charging stations, data server centers, and energy storage systems.

The high-voltage **NCP-3200** 380VDC model serves as a power supply and is ideal for high-voltage centralized power supply, horticultural lighting systems, semiconductor equipment, and energy storage equipment. It is particularly suitable for parallel power supply with high-wattage and high-voltage DC power, making it an excellent choice for end customers in the industrial market looking to connect in parallel and increase wattage for their applications.

Designed with built-in programmable output voltage (PV) and programmable output current (PC), the **NCP-3200 series** has the flexibility to adjust the output voltage or current through external analog signals. In addition, they can also be easily combined with 19" Rack chassis in parallel to provide up to 128kW intelligent chassis, or stack each chassis in parallel to form a system power supply or charger with larger wattage.

We believe that the **NCP-3200 series** offers superior performance, reliability, and flexibility, making it an ideal choice for demanding industrial applications. If you require any further information or have specific queries regarding the product, please do not hesitate to contact us.
