

Brand New Human Vibration Meter from Castle!

Castle's NEW Hand Arm Vibration Meter!

Castle Group Ltd, leading company in the field of Hand Arm Vibration Measurement has done it again! The company has launched the VEXO, its latest Hand Arm Vibration Meter, designed to meet the ever increasing demand for a low-cost solution, with simple to use features and rugged design.

The Vexo is dedicated to Hand Arm Vibration Measurement and is the smallest and lowest cost option in its class. Making the most of the latest sensor technology and state-of-the-art electronics, the Vexo boasts a large colour screen, re-chargeable battery pack, a big measuring range, data-logging and the simplest of user interfaces, with a switch-on-and-go approach to taking measurements.

Simon Bull, Managing Director of Castle said, "The Vexo is a very welcome addition to the Castle range and gives us the ability to offer real choice to customers when it comes to assessing Human Vibration. We set out to produce a world-beater at an entry-level price, and I believe we have achieved just that!"

The Vexo measures in 3 axes simultaneously and reports results for the individual axes as well as the overall sum and gives these as averages (Aeq), maximum levels (Amax) and Peak values. The meter comes complete with VibdataLITE software for downloading and viewing data stored on the meter.
