

STELRAM

AUTOMATED SPECIAL PURPOSE MACHINERY

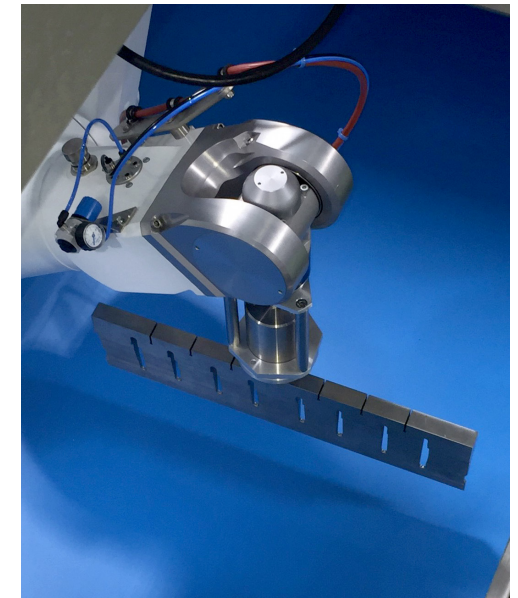

FOOD PRODUCTION SOLUTIONS

Every individual process within your production process needs to perform to the highest standards, with technologies working together for optimal output and outstanding end results.

With nearly 3 decades of experience in robotics and manufacturing automation solutions, Stelram delivers a wide range of high quality solutions for all your food and drink production requirements.

Stelram can also integrate various elements of your existing production line for increased efficiency, such as linking a standalone depositing machine to your existing conveyors. Stelram can even provide additional cleaning systems, to ensure line longevity and production standards.

"Stelrams' robotic and automation experts create exceptional solutions that deliver increased operational efficiency."
