

3 Compelling Reasons To Buy Composite Grates

- ◆ Reduced Carbon Footprint
- ◆ Lightweight—Reduced Manual Handling Risks
- ◆ Reduced Theft Risk - Limited Scrap Value

Following a recent installation on a highway in Kent we received the following comments.

“The client is more than happy with the product, and I am confident that our contractor Steadline found the light weight particularly user friendly with regard to manual handling them in to position. I have attached below the response we received from our client.”

“Michael, thanks please find attached a signed completion certificate. As normal lovely job the new gullies look great, I have raised a job to clear the channels from the carriageway side to the newly installed gullies so hopefully this will keep the water flowing of the carriageway. “

Kier Transportation. | Highways – Area 4

Installed and operating for more than 12 years in UK highways.
