

## External Cladding from Jtech Services

Jtech Services has recently completed the supply of an external cladding system for a refurbishment project in the West Midlands.

No matter how good a building is there comes a time when it needs a facelift, whether that is because of corporate adjustments or just to upgrade a façade.

As Jtech Services do a lot of cladding products, usually for pipework and other services in both Steel and Aluminium, they are ideally placed to utilise their skills to produce other types of cladding products. The profiles can be finished in practically any colour to match the location.

Once a client has chosen the materials, shape and colour, Jtech Services then provides the made to measure products and brings them to site.

The next phase is to work along with installers and offer assistance as they require. It may be that a step by step installation guide is needed for those who are installing for the first time or maybe just a general talk through for those who are experienced in the installation process, but whatever is needed Jtech Services supports and assists.

See what we can offer your project - visit [www.jtechservices.co.uk](http://www.jtechservices.co.uk) to view our other applications.
