

*FAST. FASTER.*

**SPEED NUT**

The new Speed Lock for rectangular and square punches.

# Speed Lock for rectangular and square punches

The SPEED NUT is a unique and innovative quick-lock system currently being offered on the market for all Greenlee rectangular and square punches. It consists of an rugged draw stud and a innovative quick-action bayonet coupling which unlike conventional counter nuts is not screwed onto the draw stud but simply pushed onto it and fixed with a turn.

This means longer tool life and faster and easy punching operations – up to three times faster than conventional punching tools.
