

Fitfactory to Exhibit at Advanced Engineering 2021

Location: Advanced Engineering Show, NEC Birmingham

Date: 3rd – 4th November

Stand No.: C22

We're delighted to be exhibiting at this year's **Advanced Engineering Show 2021** on the 3rd – 4th of November. You can join us on **stand C22** where we will be promoting our **Streamline, Connect, Analyse, Level-up, Extend (SCALE)** model to enable advanced engineering to achieve digitalisation.

Following a 2-year absence due to the pandemic, we are excited to be exhibiting at one of the leading manufacturing/engineering trade shows in the UK. With an expected two-day attendance of 10,000 engineering professionals, Advanced Engineering promotes supply chain business and technology transfer across aerospace, automotive, medical technology, energy, and indeed any sector that involves high-value manufacturing, R & D and innovation.

Bringing together thousands of attendees from OEMs, tier 1 manufacturers, and supply chain partners, Advanced Engineering is the UK's largest annual advanced engineering and manufacturing event.

Advanced Engineering Fitfactory 2021

Fitfactory at Advanced Engineering

On our stand, we will be joined by our sister companies **DNA.am** and **Valuechain Technology** to demonstrate our end-to-end modular digital transformation solution that makes digitalisation achievable for all. We will showcase the following:

- **Insights:** Our new **business intelligence solution** generates actionable insights to grow your business. It consolidates information from different sources into a

single, easy-to-use tool, giving you a complete view of your business. And, you can set up rules that trigger alerts, send emails and create tasks. So, when issues occur, you notify the right people in real-time to take action and they receive a notification direct to their mobile device.

- **Asset Manager:** Simplify calibration and asset management with an intuitive system that keeps everything in one place and provides full traceability. Integrating with your MRP system, it tracks asset location and maintains history, certifications and usage logs, ensuring your assets are always up to date.
- **Supplier Portal:** Valuechain's Supplier Portal is a collaborative platform that improves supply chain performance. It **analyses** real-time performance from ERP system, **shares** information with suppliers and enables **collaboration** to resolve issues and drive quality, cost and delivery improvements.

We will have all of these and more (including a surprise!).

SCALE with Fitfactory

At Fitfactory, we enable engineering companies to Streamline, Connect, Analyse, Level-up and Extend (SCALE) their business through digital transformation. We have more than 25 years of experience delivering technology to streamline and digitalise manufacturing processes. Additionally, we providing market-leading modular MRP systems for engineering, manufacturing and treatments companies that is ideal for highly regulated sectors such as aerospace, automotive and oil & gas.

Now, we support more than 400 companies to improve efficiencies from enquiry to invoice through scheduling, CRM, MRP, SFDC, data capture, asset management, business analytics, supplier portals and customer portals. Our SCALE model enables companies to build an end-to-end roadmap for digital transformation success. From streamlining operations to analysing performance and extending your supply chain ecosystem, we help you identify the right technologies for your business and implement them at the right time to achieve your goals.

Meet us at Advanced Engineering 2021

Join us at the Advanced Engineering show on stand C22 on the 3rd-4th of November 2021 to learn how we can support your digital transformation projects.
