

# Introducing Photoshop It.

The team at Yellow Circle would like to invite you to attend a brand new Photoshop training course aimed specifically at your business.

---

## What is Photoshop It and who is it for? 🤖

A Photoshop course aimed specifically at small business owners, marketing/ PR, sales, admin, freelancers and other business employees who want to learn the basics of Adobes Photoshop software.

---

## How does the course work? What are the benefits and who's running it?

We offer a friendly relaxed "around the table" learning environment. And by offering only a limited number of spaces per course date, we ensure attendees get the most from the experience.

Our half day workshop delivers the practical skills needed in a number of day to day tasks – saving

you time, as well as the expense of outsourcing for small image jobs and giving you the confidence to create and edit small graphics quickly and effectively.

---

Callum our Photoshop expert starts with an overview of Photoshop and its uses, before walking you through the basics from setting up a document, and navigating the workspace, to Photoshop's most useful tools and how to use them.

---

## What will the course teach me to do? 🤖

By the end of the course, you will be using Photoshop to:

- Design and create blog post images
- Design and create branded social media graphics
- Edit product images for use on your website
- Remove backgrounds from images
- Crop and resize images
- Edit and improve images for maximum effect

## Photoshop It delivers valuable skills, with easy to follow methods - for best results!

All of this within a comfortable learning setting amongst like-minded individuals. If you/your business would benefit from this course please register your interest and take advantage of our early bird 10 % discount offer.
