

Bespoke stainless steel BBQ line conveyor

Our manufacturing team at LS Engineering & Advecto are ready to despatch this bespoke stainless steel BBQ line conveyor which we have finished building this week!

We have yet another happy customer who ordered a bespoke stainless steel conveyor for their application. This specialised catering solution is designed to suit our customers' specific requirements. The skewers are placed in the holes to sit vertically while operatives pierce the meat and veg from the ingredient trays to make the perfect BBQ Kebab. The main features include:

- Manufactured from 304 Grade Stainless Steel
- Belt Driven

- Bespoke Fabrication
- Mobile For Use In Different Locations
- SEW Motor Gearbox
- Perfect For Safe Use In Food Production & Catering Environments

Are You Looking For Bespoke Stainless Steel Catering Equipment?

We design, sell and manufacture a high-quality range of stainless steel catering equipment, as well as offering stainless food production solutions to suit your needs. We also have a list of special offers which are currently available for a limit time only.

Whether you have a particular production challenge you need solving or would like to completely overhaul your processes with a new project scheme, contact our team for experienced, professional and skilled advice. The team can be reached by calling +44 (0)1952 814822 or emailing sales@lsengineering.co.uk
