

### 16ft bespoke canteen and toilet unit

We were asked to supply an all in one canteen and single mains toilet block, for a new customer, who wanted a cost-effective, yet long-term site accommodation solution for multiple projects across London and the South East.

Taking an existing hire fleet unit, we were able to completely re-condition the internals, to include new wall panels, new hot water boiler, lino floor and also re-condition the externals. In addition, the single (mains) toilet section was refurbished to a high standard, to provide a secure, site welfare and accommodation solution.

The conversion project was completed successfully, within the required time-frame and also within the customer's budget, something which is also important to ensure we can provide a cost-effective solution to our clients.

If you are looking for any specific containerised and bespoke site solutions, feel free to contact us, as we can convert existing units and also new units, to make your project a reality. Complete a **QUICK QUOTE** online or call our offices, on the number above.
