

### **SIC Ltd, Setting the Standard for Electrical Sub-Contracting**

As one of the UK's leading manufacturers of cable assemblies, control boxes and panel wiring for over 50 years and helping to develop over 14,000 product lines for a range of applications into over 24 vastly different sectors, our technical team are regularly challenged with demanding product requirements, manufacturing timescales and material sourcing to maintain our guarantee of manufacturing excellence for our growing customer base.

It is this extensive history that has allowed us to develop our product and industry knowledge that help us serve our customers with optimised manufacturing solutions for electrical and mechanical assemblies ranging from one-off bespoke items to setting up dedicated manufacturing cells for large scale orders. It's this flexibility in our resources that help us provide real value to our customers and allow us to work alongside them as a manufacturing partner.

Our experienced engineering department offer design review and sign-off for your product prior to investigating and selecting the optimal materials and manufacturing processes. We carry out 100% product testing using specialist in-house designed testing apparatus and offer our customers a variety of delivery methods to best integrate with their manufacturing schedule. This system keeps our customers informed and involved at all stages to guarantee the highest quality product is provided on-time, every time.

At SIC we have a strong track record as a trusted supplier to a number of major manufacturers across a multitude of industries and as a result, we understand that quality is paramount in all we do. All of our products are assembled at our 188,000 sq. ft. UK manufacturing facility which is backed up with ISO9001 & ISO14001 quality and environmental certification as well as UL, NICEIC & IPC accreditation.
