

LOSS PREVENTION: SECURE FIXTURES

Our intelligent lockable doors ensure that high risk, high value products are secure but remain accessible for genuine customers.

They can be configured to open on a time-delay, or send a message to headsets so that staff are aware that help is required.

Our aim is to display high value, high shrink goods at the lowest possible risk, while still enabling customers to browse and select without waiting for staff to unlock the product. We are leveraging the benefits of Automated Retail solutions to protect high shrink products while encouraging sales by allowing customer access to the products.

Example Benefits

- ▶ **Protect high risk products**
- ▶ **65% reduction in shrink**
- ▶ **Maintain sales & service**
 - Products are visible and accessible to consumers, encouraging sales
 - Increased sales and reduced loss from theft and damage
 - Little or no staff interaction and no expensive tagging system required
 - 65% reduction in shrink for products managed by automation

31%
