Parade Green is a brand new student accommodation development in Oxford and offers over 800 rooms. The design was inspired by Oxford's historic college quads, with plenty of open space to give it a village feel.

Langley Design were approached by the RG Group as there was a requirement for cycle parking facilities for the large number of occupants. As the UK leading manufacturer of timber cycle shelters, we were chosen to manufacture and install our Sheldon units in various locations across the site. In order to optimise the use of space, our two tier cycle racks were seen to be the most suitable option to accommodate the large number of bikes.

The project also required canopies to be installed in the courtyard to provide covered seating areas for the students to enjoy the outdoor space in any weather. As a bespoke manufacturer, we were able to produce a canopy with timber cladding to the sides of the units which offered additional protection from the wind whilst still allowing airflow and light through the unit. The end result looks fantastic and the RG Group were delighted with the flexibility of the Langley Design installation service and our ability to meet the tight deadlines.
