

METCASE'S NEW TECHNOMET TX TOWER ENCLOSURES FOR DESKTOP INSTRUMENTATION

METCASE has launched TECHNOMET TX, an elegant new range of premium tower enclosures for tabletop electronic instrumentation.

With a space-saving footprint to maximise workstation space, these smart new aluminium enclosures are ideal for test and measurement, industrial control, medical/wellness, peripheral devices and interfaces, communications and laboratory equipment.

Like METCASE's other TECHNOMET models, new TX has a modern, cohesive design with no visible fixing screws. Diecast front and rear bezels fit flush with the main case body. Snap-

on front and rear trims hide the assembly and front/rear panel screws. There are ventilation holes in the base and rear panel.

Depending on tower size, the internal chassis can accommodate either three or four accessory shelves which are designed for mounting the PCBs and electronic assemblies. These shelves can also be supplied pre-punched and fitted with inserts and pillars according to the customer's requirements. There are M4 earth points on all panels. The enclosures also feature side handles and non-slip ABS feet. The front panels are supplied separately as accessories.

TECHNOMET TX is available in two standard sizes – 280 x 175 x 240 mm and 350 x 220 x 300 mm – and two standard colour schemes: anthracite (RAL 7016) and traffic white (RAL 9016)/traffic grey A (RAL 7042).

METCASE can supply TECHNOMET TX fully customised. Services include custom sizes (heights, widths, depths), custom front panels, CNC machining, fixings and inserts, painting and finishing, and photo-quality digital printing of legends, logos and graphics.

TECHNOMET TX is the latest addition to the TECHNOMET series of enclosures which includes portable instrument enclosures, sloping front enclosures, VESA-mount HMI enclosures and 10.5"/19" rack enclosures (3U to 6U).
