

## New **Outdoor** Advertising A-Board From **£3.25** per day\*

### 43" **Battery Powered** Dynamic Signage Perfect for **Indoor** and **Outdoor** Advertising

Digital signage is the best of all approaches to advertising – it uses a high-quality **commercial-grade** 43" screen, which displays a range of content that catches the eye of your target audience far better than a static poster.

The advanced digital technology is easy to use, allowing you to add dynamic content as soon as you need it and deliver impactful messages in a way that no other advertising media can.

Not only this, but the unit is designed to be **mobile**, easy to place exactly where you need it every time, with an IP65 rated screen ideal for both **indoor** and **outdoor** use, featuring more than **twice the brightness** of a standard television.

---

## Market Anything, Anywhere and Anytime

Strategically positioned A-Boards have near-unlimited possibility to advertise, guide people through venues, display itineraries, timetables, and the latest news which is easily updated in an instant. Among many other uses, the A-Board is perfect for:

- **Hotels**
- **Retail**
- **Car Showrooms**
- **Museums and Galleries**
- **Restaurants and Bars**
- **Conference Facilities**
- **Schools and Education**
- **Sports Venues**

These A-Boards can also be personalised and fitted with **logos** or messages, as well as wrapped with your company's branding as desired. They also feature a powerful battery, able to display for up to **12 hours** without requiring a charge, and can also be mains powered.

---

## Evolving and Expanding Technology

The advanced power of Android technology working in conjunction with our high-quality displays can bring your advertising vision and event goals to life, with screens able to display **still images**, **videos**, **animations** and even **live feeds** such as tweets, weather reports, live news and announcements.

With the easy to use **Free** Scheduling Software using USB or optional Network Upgrade, you can connect to your screen via Wi-Fi, Ethernet LAN or even over a 4G mobile network (upgrade required). This makes it incredibly easy to keep your A-Board consistently updated, either through immediate updates or scheduled throughout your day, ideal to showcase time-limited deals or to make announcements to your customers.
