

Introducing the new ASCO Numatics 652 Series: an Air Preparation Range designed for use on Machine Automation & Process Industry Applications, plus any other application where you need to control pneumatic air.

Our new range offers:

- ✓ One of the **highest flow rates on the market**
- ✓ A **compact design**
- ✓ A **highly versatile product range**

Unlike many other Air Preparation ranges, the 652 Series is available with a flat integrated gauge, making it easier to read, simpler to install, and saving you space and time.

The 652 Series complies with **ISO 8573.1:2010** and **ISO 2500** air purity classification

The Range

Comprising filters, regulators, lubricators, filter-regulators, gauges and a range of operating valves, we have created a highly competitive and versatile range.

This complements the existing range of ASCO Numatics Air Preparation products, along with the Full Stainless Steel 342 Series, the small 105 Series, and the Delta filter line – allowing you to achieve the best possible results in your pneumatic air application.

How to Order

You can find more information on the full range, plus datasheets and catalogue information on the [652 Series webpage](#) or by contacting your local sales representative.

The 652 Series is available on [Express](#) Same-Day, which aims to ship your order the day it is received.
