

Surface World Exhibition proves a business hit for Bolton based filtration company

CPL Filtration exhibited at the recent Surface World Exhibition in September; generating plenty of good quality business leads and site visits, Mark Longworth came away a happy business owner.

Mark runs 'CPL Filtration' who supply a range of filtration solutions, supplies and cleaning services. Mark knows that every business, whether you're from the industrial and chemical sector, the food and beverage sector or the pharmaceutical sector, operates differently and so is able to work flexibly and use his years of knowledge to further support his potential customers - like you!

On display CPL Filtration demonstrated the wide range of products they offer which included Pleated polymeric filters, Depth filtration, Carbon filtration, Reverse osmosis, Water softening and Bag filtration.

The Purtrex spun-bonded cartridge was a popular choice with exhibitors as it meets the requirements of most applications where long life, high purity and low change-out frequency are required. Produced through GE's patented melt blown microfiber

technology, Purtrex is a 100% pure polypropylene depth filter with exceptional dirt-holding capacity.

CPL Filtration also launched their Water Filtration range and had on show the stylish and compact Soft H₂O Chrono cabinet system along with the flexibility of the stand-alone Soft H₂O Pro pressure vessel and brine tank.

CPL also had a range of Pleated polymeric filters on the Show stand which covered a wide range of applications where absolute rated pleated filtration is needed. CPL's polymeric cartridges are great value and are constructed from either polypropylene, polyethersulfone, polyester or glass fibre materials and are assembled using the latest thermal bonding equipment in an ISO cleanroom. Filters are offered in SOE, DOE and come with a variety of end configurations to suit the application.

CPL are able to supply a wide range of housings along with accessories needed to keep your filters well maintained.
