

stoneCIRCLE fabricates Scandinavian Styled Stone for Studio Franzén

Studio Franzén has just opened on the top floor of Harrods. The latest restaurant in the chain run by Björn Frantzén serves his signature Nordic food influenced by Asian and French cuisine, and the restaurant décor also reflects this with a luxurious re-interpretation of Scandinavian design.

stoneCIRCLE was chosen to fabricate the stone for the restaurant as it has been providing all of the stone for the Harrods refurbishment.

Square lattice work on marquetry used for the furniture is echoed on the floors, where a geometric grid of terrazzo has been inlaid with Verde Antigua marble in some areas and Rosso Barocco marble in others. In all stoneCIRCLE cut 15000 squares out of the terrazzo and inserted 15000 marble inserts, before grinding the surface to a honed finish, and sending them to site to be installed by the contractor.

The company also fabricated the vanities for the restaurant washroom in Rosso Barocco.

project details

Client: Harrods/ Frantzén Group

Architect:

Contractor: Jaysam
