

Free training day with **BMS** **Technologies, Fronius a** **nd BYD.**

Discover **Fronius Verto & GEN24 Plus** hybrid inverters and compatible **BYD HVB** battery systems.

When: Wednesday 17th December

Time: 10:00 - 15:00 (Entry from 9:30)

Cost: Free! includes lunch and refreshments

**Where: Fronius UK Ltd. Technical Competence Centre, Milton Keynes.
MK10 0BD**

Join Fronius Sales Partner **BMS Technologies**, **Fronius UK** and **BYD** for a hands-on training session designed for solar PV installers looking to deepen their expertise with **Fronius Verto** and **GEN24 Plus hybrid inverters** and **BYD HVB battery systems**. This course offers practical insights into system design, installation, and commissioning, with a strong focus on Fronius technology and integration best practices.

Spaces are limited – secure your spot today! Bring your colleagues and make the most of this opportunity to elevate your skills and grow your business. See more below...

About the training:

Led by expert trainers from both **Fronius** and **BYD**, this event will cover:

- An introduction to **Fronius** and their **Powered by Europe** solar energy solutions
- The **Fronius Verto Plus**: The NEW three-phase inverter from Fronius - its applications, design, installation and commissioning processes
- The **Fronius GEN24 Plus**: The hybrid inverter for residential PV systems
- **Monitoring** and **troubleshooting** using Fronius digital tools
- How to improve the ROI and self-consumption of a PV system with additional energy management solutions from **Fronius** for both **heating** and **EV charging**
- AI based energy management for optimised energy flows with the **Fronius Energy Cost Assistant** (ECA).
- **Introduction to BYD**
- The **BYD Battery-Box HVB** the first residential/ small commercial battery storage system featuring the BYD Blade Battery technology.
