

Benefits of Leasing Waste Compactors and Balers

As we enter the new decade there is ever-growing pressure for businesses to implement efficient waste management practices. With consumer trends shifting towards favouring greener businesses, in addition to ever-increasing landfill taxes – there has never been a better time to invest in waste management equipment. Organisations can not only benefit from an environmental aspect but also financially by significantly reducing their waste disposal costs.

Despite this, organisations are often reluctant to tie up existing lines of credit or capital by investing in new machinery. That's why at Landfill Alternatives, we offer affordable leasing contracts on our new and refurbished [Waste Compactors](#).

What are Waste Compactors?

[Waste compactors](#) are used by all organisations with more than a couple of 1100Ltr wheelie bins emptied per week for low-value mixed waste. They're designed to compress this waste to reduce the volume of space it requires and in turn minimising collections. [Leasing a Compactor](#) presents a fantastic cost-saving opportunity for your business including a host of other benefits such as;

- Improved Productivity
- Eliminating Fly Tipping
- Tidier Work Environment
- Labour Savings
- Reduces Onsite Traffic which is Better for the Environment
- More capacity in your Bin or Skip

Why you should Lease a Compactor

Despite the numerous environmental and financial [benefits offered by Compactors](#), for many businesses it can be difficult to raise the capital required to purchase one outright – that's why leasing a new or refurbished Waste Compactor may be the best option. There are also a host of other benefits including:

Tax-Deductible

Lease payments for a Waste Compactor are classified as a business expense and are therefore tax-deductible. In short, by leasing a compactor you can reduce your impact on the environment, disposal costs and tax bill.

Latest Equipment

By opting to lease your equipment instead of purchasing it you have the option to upgrade to newer machinery at the end of your agreement. This ensures you benefit from the latest technology, maximising efficiency.

Upfront Capital

Leasing Waste Compactors instead of buying outright removes the large capital investment. This frees up working capital for other business expenses such as wages, advertising, and stock.

Budget

Rental payments are agreed and fixed in advance and therefore your business can budget your expenses and improve cash flow management. In addition to this, leasing through Landfill Alternatives frees up your existing lines of credit improving your liquidity.

Flexibility

If your business is rapidly expanding you may find yourself quickly outgrowing the capacity of your equipment. If you have Landfill Alternatives leasing agreement you're able to scale up the size of your machinery during or at the end of each lease agreement. This ensures you're not paying for excess capacity from the get-go.

Leasing Waste Management Equipment at Landfill Alternatives

Leasing equipment [with us](#) is a straightforward procedure. The first step is organising an onsite audit to determine what machinery is best for your specific business requirements. We then draw up a proposal outlining our recommendations and a suitable payment plan. On receiving your completed rental form we then deliver, install and provide free training for your system.
