

RABScreen® Flexible Filters

RABScreen® flexible filters are flexible, vinyl framed, equipment protection filters. They are manufactured to fit any size or shape of air intake opening.

Model U filters can be attached to any flat framework with drop tab fastenings, stainless steel grommets, hook & loop, sheet metal screws or any other fixing of your choice.

All filters are manufactured to the EXACT size ordered.

To measure:

To measure rectangular or square:

Mark a point 32mm from each edge of the widest edge of your opening.

Measure point to point and note down.

Repeat for the shortest edge and note down

500 x 500 opening size = 564 x 564 filter size which will include the 9.5mm grommets and 32mm vinyl border.

To measure triangular:

Measure the three internal sides of your triangle.

Check that you have a at least 32mm on each edge to take a fixing.

500x500x1200 triangle becomes 564x564x1264 filter size which will include the 9.5mm grommets and 32mm vinyl border.

To measure circular:

Measure the diameter of your circular opening.

Check that you have a at least 32mm on each edge to take a fixing.

500 diameter circle becomes 564 diameter filter size which will include the 9.5mm grommets and 32mm vinyl border.
