

Soundtect®

NEW Product Launch

Introducing **Acoura**, a new lightweight acoustic ceiling system from Soundtect.

Manufactured from 70% recycled PET and offering supreme sound reduction, this system of U shape channels nestling quietly with a hidden unique, but carefully engineered, easy to install fixing method, is perfect for wall-to-wall ceiling applications. **ACOURA**, available in 24 colours or printed finishes and a variety of widths and depths, offers unbridled reverberation control and a beautiful, serene addition to any room.

Acoura, the newest line in the Freestyle range is yet another well thought addition to an already impressive collection of wall and ceiling acoustic products designed to capture reverberated sound and reduce echo, and with the products certified Green to the highest level Globally, our clients can be sure they are also buying into a brand that takes environmental issues seriously, and can specify these wonderful acoustic solutions into the highest level sustainable projects in the world.

SEE the Acoura installed in our showroom from May when you visit us during Clerkenwell Design Week!

Soundtect has been manufacturing a wide range of acoustic solutions for 13 years using post-consumer recycled PET to manufacture their products. Recently we have been awarded the **Global Green Tag** certification level B for the sustainability of our products and the Platinum certification for Asthma and Allergy sensitive credentials.

Global GreenTag is one of the world's most robust, trusted and widely recognised eco labels. "We independently assure that every product is fitness tested and certified under one of our two leading certification programs that use the world's best scientific methods. That's why we have earned the reputation and trust of thousands of buyers, hundreds of companies and numerous green building councils, certification bodies and governments around the world"

NEW - Global Green Tag Certified

Harmony

Recently completed HR Owen showroom in Hatfield embraced the Freestyle Harmony in this beautifully designed building by Louis De Soissons. This high ceilinged open plan space was a recipe for reverberation issues but the beautiful panels took the strain and it looks amazing.

Harmony is pre-cut slats of Freestyle acoustic felt pre-fixed to another sheet to create a beautiful slatted panel which not only works incredibly well acoustically but is also quick and easy to install. This clever product, which was a finalist for the Mix Awards last year is available in 24 colours (you can use as many as you like per panel) or wood effect finishes.

[Harmony - see website for details](#)

With agents all over the world, we have the opportunity to work with all types of sectors and this project in Oman for Ahlibank HQ building in their multi purpose hall is a stunning use of the Freestyle integrated with lighting to create a dramatic and beautiful space.

Finally and last but definitely not least.. we want to say a big “Whoop Whoop” to all the Women in Construction on International Women’s Day
