

Let's get Creative – Soundtect Acoustics set you Free

UK based acoustic solutions manufacturer and supplier **Soundtect** launched their **Freestyle®** product range in 2018. This lightweight, semi-rigid sound absorbing panel that can be used in a variety of design and interior solutions. As a growing trend in the acoustic sector this product is one of many on the market revolutionising the approach to acoustic absorption but why is it so popular?

What makes **Freestyle®** so innovative is its incredible versatility - providing the perfect noise absorption solution in any domestic or commercial interior design spec. The sheets are available in a wide range of colours and can be integrated as stylish wall and ceiling panels or as suspended structures to create a standalone feature. The product capabilities are extensive - panels can be bold and vibrant and arranged to create an interesting pattern, or neutral to blend in and be discreet – that's the beauty of **Freestyle®**.

From an environmental point of view and one of Soundtect USP's, this product is manufactured from 100% polyester, 70% of which is post-consumer recycled material. In fact this product is a third generation recycled solution as the components are actually re-used from exhibition carpets which themselves were produced from waste plastic, something we are very proud of here and Soundtect. And furthermore as a manufacturer, our clients have the peace of mind that they are getting the best product and price by dealing with us directly.

Soundtect™ manufacture and supply highly design led acoustic treatments for walls and ceilings. Providing innovative acoustic solutions for Education, Offices, Commercial, Hospitality, Leisure and Domestic applications. Using recycled materials for their panels, Soundtect™ has managed to camouflage acoustic function with imagination and produce panels that are technically admirable due to their finely tuned balance of reverberation control and sound absorption.

Freestyle® is completely safe, environmentally friendly, non-toxic, non-allergenic and incredibly easy to maintain.
