

Soundtect®

Highlighting the latest product innovation from Soundtect - the Acoura Acoustic Ceiling System. This revolutionary acoustic solution is lightweight yet robust, designed to handle the demands of open and hard-surfaced spaces where reverberation can be problematic. Constructed from 70% recycled PET, the Acoura Ceiling System is eco-friendly and exhibits our commitment to sustainability. The system is highly customisable, offering bespoke widths, lengths, and depths to suit various architectural needs. It promises to create an enriching aura in any space, effectively managing the acoustics and enhancing the overall environment. Don't let the noise get in the way of your space's potential, choose Acoura for superior acoustic control.

Incorporating Soundtect's unique Timba printing methods, our product seamlessly marries functionality with aesthetics, offering you the Acoura in a timber finish of your choosing, in addition to the existing 24 vibrant colours. This blend of technology and design allows for the creation of acoustic solutions that not only control sound reverberation but also enhance the beauty of any space. Unleash your creativity by choosing a finish that truly reflects your style and complements your décor.
