

## New Cricket Scoreboard Range for 2023

Cricket is one of the most popular sports in the world and is enjoyed by millions of fans. One of the most important tools of a cricket ground is the scoreboard, which provides fans and players with all the information they need to follow the game. The modern LED scoreboard provides a summary of the game's progress, including the score, the number of overs bowled, the number of wickets taken, and the run rate.

The Stuart Canvas range of cricket scoreboards can be updated regularly throughout the game via the remote control to provide a real-time view of the game's progress. The newest additions to the range for 2023 include the SCC 9 Digit, SCC 19 Digit and SCC 19 XL Digit scoreboard. These can feature the latest 100,000 hour bright yellow LED technology to ensure a clear score that can be easily visible from distance.

Constructed from a powder-coated steel frame and UV stabilised Acrylic the scoreboards are durable and can be either wall mounted or fitted to a wheeled trolley for easy use and storage. Anti-vandal shutters can also be incorporated into a wall mount or a stand-alone frame for added security.

The SCC 22 digit scoreboard is also part of the Stuart Canvas cricket scoreboard range, this top of the line electronic scoreboard displays; both Batsman Scores, Wickets, Overs, first innings, Duckworth Lewis Stern (DLS) and the total score. Providing all the information needed for all players and spectators to follow the game in detail, the scores can also be added to 'Play Cricket' directly from the scoreboard.
