

Space Tech Expo USA

Join us in May at the Space Tech Expo USA Exhibition

NVT Group companies Data Physics and Team Corporation will be presenting their Solutions for Qualification of Space Hardware

May 2-4, 2023 | Long Beach, California

Data Physics and **Team Corporation** specialize in working with leading manufacturers of space systems to create laboratories capable of testing critical flight hardware.

- Single and multi-shaker tables with high force capability and patented bearing technology for dealing with high overturning moments
- Advanced single and multi-shaker vibration control systems with acceleration and force limiting, that are capable of Random, Sine, SRS, and Sine Burst testing
- Acoustic modulators and acoustic control systems for RATF and DFAT testing
- Proprietary advanced safety systems for protection of flight hardware and safe shutdown of testing

Visit us in booth 2038.

About the Event

Space Tech Expo USA is returning to Long Beach, CA for its 11th edition. North America's premier exhibition and conference is your one-stop-shop to discover the brilliance that the space industry has to offer and the must-attend event in your 2023 calendar.

Join your colleagues, peers and competitors this May, (3-4) for two-days of face-to-face collaboration, where you will also get to explore new technologies, meet new business partners, and learn from the industry's most in-demand thought leaders at the conference. All aspects of the event are free to attend with your Space Tech Expo pass.
