

Introducing the Twister 80 Basket Parts Washer

The new Teknox Twister is an ideal washing system for spray washing multiple small components contained in a preloaded detachable stainless-steel basket.

The Twister uses water and a cleaning detergent that is controllable up to 80°C, the water is recycled within the system. The basket is slowly rotated during washing under the spray jets to remove machining oils. After washing an oil skimmer can be operated to remove the waste oil that floats on the surface of the water and then collected in a waste oil container next to the machine. The parts can also be rinsed with water to remove any residue from the cleaning solution and a drying system of compressed air and or heated drying can also be fitted.

We manufacture all our parts washers in Aisi 304 stainless-steel and can adapt our washing systems to reduce your cleaning process and handling times. For further information please drop us an e-mail below or visit our web site.

We also have a YouTube video library to see our other cleaning processes at <https://www.youtube.com/user/TEKNOXITALY>
