GET READY FOR HARVEST WITH A BIG BRUTE

Michael Williams Engineering Ltd have been serving the farming community since the 1970s. During that time, we've listened to our customers, designing, developing and building many types of Big Brutes. Our large range of machines enables farmers to clear up arduous mucky jobs quickly and easily.

Preparing for harvest is always busy, cleaning out grain stores or pack floors etc ready to store your new harvest. You can make this whole process far quicker and safer with the right Big Brute. Not sure what Big Brute you need? Would you like to see how our machines can help you? We offer **free demonstrations** to show you how these powerful Big Brutes can make your life much easier!

Our Big Brute Popular is ideal for silos, elevator pits, conveyor trenches, floors, under floor ventilators to name but a few. It's designed specifically to tackle these places with its awesome suction power. Attach it to a Big Brute Bulkmaster and handle your grain with ease with its massive capacity and rapid emptying.

Large storage floor areas to clean? This is an easy task for our Big Brute Warehouseman! With the front-mounted floor brush you can clean large areas of floor at walking pace. Clean up all the fine dust from your potato store floors quickly and easily, reducing airborne dust.

All Big Brutes are designed and built in the UK. Their strong, robust design ensures that they work hard for you over many years.

Visit us and try using our Big Brute at Cereals Stand 522. Our Bangalore Bird Scarer will also be on display.
