

Power Up Your Business

World's Premium brand for Embroidery Machines

A company with decades-long experience, SWF have been developing and manufacturing sewing and embroidery machines since 1974. Built to exacting standards, the machines are recognized world-wide for their quality and overall reliability. The hardware, software and firmware used in SWF machines is the result of painstaking research and development.

"In that time, we have supplied machines to various business models for various reasons, and one of the key things that we have learned, is that there is an SWF embroidery machine to suit just about any business," say YES Ltd.

So, what does your business need?

- An increase of your production? No problem at all: the SWF KS Series, with its high-speed colour changing and servo design system, can earn you 20 to 30 per cent more than any other brand.
- A fully integrated production system? No problem, again: SWF modular machines come with wi-fi networking.
- You want to do more with less, increase the flexibility of your workshop and improve profitability? This is easily sorted with the unique SWF dual-function machines: these are the only machines on the planet that can embroider two different patterns and/or designs at the same time, making them unique as the most productive machines currently available.

And it gets better ...

With the SWF ES and KS Series, you get the amazing Free Hand Design and Photo Stitch options for free. These "little" perks offer the possibility to either draw your own design, using the tip of any pen or similar device, directly onto the touch screen (with the Hand Stitch option), or to upload any image onto a USB stick and into the machine's software, and convert it into a stitch design (with the Photo Stitch option). Yes, it really is this simple and it comes with no extra charges.

Training and timeless support for your embroidery machines

Training and support, should you need it, will always be available for you. This is where YES Ltd. completes the picture, offering expert knowledge and guidance whenever and wherever you might need it.

"Our experience with SWF is not just as a supplier, but also as a partner. We have been heavily involved over the years with the development of some of the key features of SWF machines, so we have a unique insight into all aspect of the machines."

"A business is a little like a jigsaw. Each piece on its own has no meaning, but when they are all put together, they are a complete picture. This is how we see it: Your business, SWF and YES Ltd."

We all want to expand and grow our business, but sometimes we need something extra to get things moving; something to give us that extra power. Together, SWF and YES Ltd. can give you that extra power and provide that ever so needed bridge to success.
