

## Early Years new products for spring 2024

We are welcoming spring with a wide variety of outdoors products to spend more time in nature. Children will appreciate outdoors activities!

The Recycled Plastic Outdoor Table Tennis Table is ideal for schools or public play areas. Encourage new sports and social interaction skills with this fun addition to your playground or outdoor area.

To explore the creative side have a look at our easels and chalkboards, or use the plastic tray with sand, water or paints to let them create their own little worlds.

For calmer more contemplative activities these pinewood planter sets will provide the perfect space to develop new skills whilst also learning about the natural world and healthy eating.

The Water Wallboard set is designed to encourage children to have fun playing with water whilst at the same time learning to understand how water flows. Water play provides hours of valuable early childhood experiences and helps to develop creativity and imagination.

We also have plenty colourful junior height seating, a lot of which is made of recycled materials so when they can enjoy somewhere inviting to sit to have a chat & make new friends.

Our Play Gym Sets have been designed to stimulate and challenge the physical development of toddlers & pupils.

The sets feature different elements including climbing trestles & platforms with additional climbing walls / bridges. Children will have great fun whilst interacting with playmates & developing their physical, coordination, and social skills.

Check out all our new products on the Early years section of our website.
