

## Corona-virus Cleaning

The worldwide Coronavirus (COVID-19) outbreak has people scrambling to protect themselves, their homes and businesses from potential contamination. The effects of this type of biohazard situation can last up to a week and the continued spread of the disease has led to a growing number of fatalities in the US. Aftermath Services is the industry leader in infectious disease and biohazard remediation, including coronavirus disinfection, and delivers the highest professional standards possible. We are dedicated to providing rapid emergency response 24/7 throughout the US so you can have peace of mind in the event of an outbreak.

Coronavirus has quickly gained a reputation for being particularly insidious. It can survive on surfaces for up to a week and people infected by the virus don't show symptoms until approximately two weeks after infection, making it difficult to track and contain. This is why having a trusted professional disease and biohazard remediation company on your side is so important. Aftermath adheres to all OSHA regulations, is certified by the IICRC (Institute of Inspection Cleaning & Restoration Certification) and strictly follows the most state-of-the-art procedures when it comes to disease cleanup and disinfection. Coronavirus (COVID-19) is still novel, so we continually consult with the Centers for Disease Control & Prevention (CDC) for up-to-date solutions and utilize CDC approved and EPA registered disinfectants.

**DISINFECTING CORONAVIRUS** We use CDC approved and EPA registered industrial-strength disinfectants with a broad spectrum kill claim. All infected materials are cleaned, disinfected, and properly disposed of as biohazard waste. Fully encapsulated personal protective equipment (PPE) and full-face respirator masks are worn at all times by our certified cleanup technicians. We adhere to a stringent coronavirus demobilization process for our equipment, trucks and waste storage areas. Disease outbreak is an extremely serious situation and we understand that the health and safety of you, your family, and employees are on the line. Don't take any chances; call in the professionals.
