

The Wait is Over – U Count is Here!

Posted on 20 January 2025 by RGIS

RGIS are proud to introduce U Count, our universal self-scan stocktaking solution designed to put the power of inventory management directly in your hands.

U Count is the most advanced solution on the market:

- ✓ Conduct professional-grade stocktakes in-house
- ✓ Universal – works on any Android or IOS mobile computing device, alternatively you can rent them from RGIS
- ✓ Use our unique industry leading **figure laser scanning technology** for enhanced speed and accuracy
- ✓ Utilise our advanced voice recognition technology
- ✓ Ideal if you have a very condensed timeframe for your stock takes and fully outsourced is not feasible

Whether you're a boutique, independent grocer, fashion outlet, or speciality store and a fully managed outsourced stocktake is cost prohibitive then [U Count](#) adapts to your needs and empowers your team to take control of inventory like never before.

Ready to revolutionise your stocktaking process? [Contact RGIS](#) today and experience the future of inventory management!

Our Technology – U Count.
