

Precision Display Solution for Medical Excellence

FORTEC UK highlights the AUO 21.5" TFT Display G215HAN01.7, a Full HD display featuring AHVA technology, suitable for medical applications. When paired with the Prisma Media ECO-II controller, this display delivers exceptional image quality, wide viewing angles, and reliable performance, making it ideal for diagnostic imaging, patient monitoring, and medical workstations.

Key Features of the G215HAN01.7:

- Full HD Resolution (1920 x 1080) – Ensures crisp, detailed visuals essential for medical applications.
- AHVA Technology (Advanced Hyper-Viewing Angle) – Provides superior colour accuracy and consistency across a wide viewing angle, ensuring clarity from multiple perspectives.
- High Contrast & Brightness – Enhances readability in bright medical environments, reducing eye strain.
- 24/7 Reliable Operation – Designed for continuous use in critical medical settings. Optimised for Medical Use with Prisma Media ECO-II

The Prisma Media ECO-II controller complements the display with:

- Flexible Video Input Support – Ensuring seamless connectivity with medical imaging systems.
- Precision Colour Calibration – Delivering accurate colour reproduction, critical for diagnostic accuracy.
- Energy-Efficient Design – Reducing power consumption for enhanced durability and longevity.
- EMC-Compliant Design – Meeting stringent medical safety standards for reliable operation. A Reliable Solution for Medical Environments.

This display and controller combination provides high-performance visuals, and seamless integration, making it a trusted choice for healthcare applications.
